| TOTAL    |                    |

• If the only  $\text{H}^+$  comes from the acid, we can deal with it in one shot.  
 If the hydrogen from the acid is  $0.2 \times 10^3 \text{ g H}^+/\text{g acid}$ , less than  $1 \times 10^3 \text{ g H}^+/\text{g acid}$ , then the  $\text{H}^+$  from the water is  $0.8 \times 10^3 \text{ g H}^+/\text{g acid}$ , less than  $1 \times 10^3 \text{ g H}^+/\text{g acid}$ .

[illegible]
